

THE PUSH-FIT SOLUTION FOR PLUMBING & HEATING SYSTEMS

Speedfit Fittings are suitable for use with copper pipe.

Celebrating 50 Years of Innovation

*Includes these **NEW** additions:*

- *Overlay Heating System*
- *Manifolds*
- *Wireless Heating Control System*
- + Many More*

UK Product Guide

March 2011

The John Guest Group has a long established reputation as a world leading manufacturer of push-in fittings, tube and other fluid control products. A reputation built on producing consistently high quality products with an ongoing commitment to value engineering and product development.

Quality Manufacture

A commitment to quality is at the heart of the John Guest Philosophy.

The strictest control is maintained by virtue of the fact that design and manufacture is carried out in modern purpose built manufacturing centres in west London and at Maidenhead in Berkshire.

Maintaining control over the whole process from initial tool design and tool making through to final assembly and testing ensuring that only products of the highest quality are produced.

The company believe it is this commitment to quality that has led to it receiving prestigious awards from many of the world's leading testing and approvals organisations.

John Guest is a preferred supplier to many international companies.

commissioning & servicing of gas fires and wall heaters*

THE PUSH-FIT SOLUTION FOR PLUMBING AND HEATING SYSTEMS

JG Speedfit is a push-fit system suitable for the plumbing of domestic hot and cold water services and central heating applications, including pressurised and combi systems.

The System is approved by the British Board of Agrément and the Water Regulations Advisory Scheme. Speedfit 'PEM' fittings and PEX and Polybutylene Barrier Pipe are Kitemarked to BS7291 Parts 1, 2 and 3 Class S Licence No KM39767.

SYSTEM FEATURES

- Truly demountable without damage to pipe or fitting
- Grip and seal connection
- Superseal Insert gives secondary seal
- Reduced pipe insertion force
- Lightweight and easy to handle on site

Performance specifications are well within those required for most central heating and water supply systems including:

- Mains fed and indirect cold water systems
- Vented and unvented hot water systems
- Vented central heating systems
- Sealed central heating systems provided temperatures and pressures comply with BS7291 Parts 1, 2 and 3 Class S
- Underfloor heating

Extensive tests have shown that Speedfit products will withstand temperatures and pressures well in excess of normal working conditions.

JG Speedfit should be installed to conform with good plumbing practice.

Speedfit should not be used for gas, fuel oil or compressed air applications.

Technical Support

Our national team of Technical Support Engineers is available to help you get the best from your **Speedfit** System. This includes a free underfloor heating estimate and CAD design service.

Technical Help Desk: 01895-425333

The **JG Speedfit** Technical Advisory Service is available to assist and advise on the aspects of the **Speedfit** System. The service is available 8:00am to 5:00pm Monday to Friday.

SYSTEM BENEFITS

- Installation time reduced by up to 40%
- Pipe flexibility permits the cabling of pipe through less accessible areas
- No risk of fire or flames from a blowtorch
- Easier to work in confined places
- A permanent leak-proof connection
- Corrosion free
- No scale build up
- Lower thermal diffusivity maintains safer surface temperature
- Pipe elasticity can reduce the possibility of bursting under freezing conditions
- Lead free and non toxic
- Less noise from water flow and expansion/contraction
- Long pipe lengths reduce fittings required

GUARANTEE

As a result of long term test programmes and rigorous quality standards, John Guest Speedfit Limited offer a 25 year guarantee against the defects in materials or manufacturing of 'PEM', 'PSE' and 'SFM' Range Plumbing Fittings and Speedfit Barrier Pipe manufactured by John Guest.

John Guest Underfloor Heating Products, Brass Manifolds and Radiator Valves, which should be installed and maintained in accordance with our recommendations, carry a 2 year guarantee from date of delivery against defects in materials and manufacture.

John Guest Plumbing and Heating Products are for use with normal UK domestic plumbing and heating systems and supplied in accordance with our Conditions of Sale.

HOW SPEEDFIT WORKS

Speedfit Fittings have a unique grip then seal construction, made up of a collet with stainless steel teeth to grip the pipe and an 'O' ring to provide a permanent leak proof seal.

Use of the **Superseal Pipe Insert** ensures a double 'O' ring seal.

The head of the insert has been designed for ease of insertion.

The additional benefit of Twist and Lock Fittings is that a twist of a screwcap locks the pipe in position and gives increased compression on the 'O' ring for even greater security.

MAKING A GOOD CONNECTION

PREPARE THE PIPE

Fittings and pipe should be kept clean bagged and undamaged before use.

Ensure the pipe is free of score marks. Cut the pipe square. When using Speedfit Barrier Pipe cut along an insertion mark. We recommend the use of JG Pipe Cutters.

To prevent damage to the 'O' ring remove all burrs and sharp edges. When connecting Speedfit Pipe use a Superseal Pipe Insert or a Standard Speedfit Pipe Insert. A twisting motion will aid insertion. The insert should only be used with Speedfit Pipe.

NEW TWIST AND LOCK FITTINGS

The fitting should be in the 'unlocked' position, this is shown with a small gap between the screwcap and the body flange.

Push the pipe fully into the fitting, up to the pipe stop. If the Speedfit Pipe has been cut correctly the insertion mark on the pipe will be level with the collet head. The 'O' ring on the Superseal Pipe Insert provides a secondary seal against the bore of the fitting. A good connection has been made.

If you are not using collet clips, ensure that the screwcaps are in the locked position.

Pull to check it is secure. It is good practice to test the system prior to leaving the site or before use. Our recommended test procedure is shown in our Technical Checklist.

ADDED BENEFIT TWIST AND LOCK

Twist the screwcap until it touches the body flange. This increases the 'O' ring seal around the pipe and locks the pipe into position.

STANDARD SPEEDFIT FITTINGS

Standard Speedfit connections are made in the same way as Twist and Lock.

Push Pipe up to Pipe Stop. If the Speedfit Pipe has been cut correctly the insertion mark on the pipe will be level with the collet head.

Pull to check connection is secure and test the system. Our recommended test procedure is shown in our Technical Checklist on page 28.

TO DISCONNECT

Ensure that the system is depressurised.

The screwcap on Twist and Lock Fittings will need to be turned back to the unlocked position.

Push the collet square against the face of the fitting by using fingers or with the help of our collet release tool.

With the collet held in position the pipe can be removed. The fitting can be used again without the need for replacement parts.

WHAT NOT TO DO

Don't use hacksaws to cut the pipe or leave burrs on the end of the pipe.

Don't use damaged or scored pipe. Score marks can cause leaks passed the 'O' Ring

Fitting may be gripped but not sealed if pipe is not fully inserted.

Don't forget to push the pipe fully into the fitting, past both the collet (gripper) and the 'O' ring.

Do not insert fingers into the fitting as the stainless steel teeth may cause injury.

Remember to pressure test the completed installation according to the recommendations in our Technical Checklist.

BRASS CHROME PLATED SERVICE VALVE •

PART No.	SIZE MM	PACK QTY	Box QTY
10HSV	10	1	30
15HSV	15	2	20
22HSV	22	1	8

Suitable for central heating systems.

BRASS CHROME PLATED SERVICE VALVE WITH TAP CONNECTOR •

PART No.	SIZE MM X BSP	PACK QTY	Box QTY
15PTSV	15 x 1/2"	2	20
22PTSV	22 x 3/4"	1	8

Suitable for central heating systems.

BRASS CHROME PLATED BALL VALVE •

PART No.	SIZE MM	PACK QTY	Box QTY
10BV	10	1	30
15BV	15	1	20
22BV	22	1	15

Suitable for central heating systems.
Each valve has red and blue indices.

BRASS MANIFOLD

PART No.	DESCRIPTION	SIZE BSP X MM	PACK QTY	Box QTY
JGMAN2	2 Port	3/4" x 15	1	10
JGMAN3	3 Port	3/4" x 15	1	7
JGMAN4	4 Port	3/4" x 15	1	5

Blanking plug supplied with each manifold.
Each manifold supplied with reversible red and blue discs.

Suitable for central heating systems.

BRASS STOP VALVE

PART No.	SIZE MM X BSP	BAG QTY	Box QTY
15BSC	15	1	10

Only suitable for central heating systems.
Manufactured in DZR Brass.

BRASS DRAIN COCK

PART No.	SIZE MM	BAG QTY	Box QTY
15BDC	15	10	50

Suitable for central heating systems.
Manufactured in DZR Brass.
Speedfit Drain Cocks cannot be used where collet covers are fitted.
They can be used with a standard fitting fitted with a collet clip.

THERMOSTATIC RADIATOR VALVE

PART No.	SIZE MM	PACK QTY	Box QTY
JGTHRAD15	15	1	10

LOCKSHIELD RADIATOR VALVE

PART No.	SIZE MM	PACK QTY	Box QTY
JGRAD15	15	1	20

BRAIDED FLEXI HOSES

Not suitable for central heating.

Hot and cold water only, 6 Bar @ 65°C

1/4 Turn Valves. These valves have been designed to allow temporary servicing of downstream equipment and must only be used in the fully open or fully closed position.

Do Not use these Valves:

- In a partially open position to control flow.
- To provide a permanent termination.
- Without tubing assembled or plugged (or threaded connections sealed).
- As a tap or "faucet".

1/4 Turn Valves are indicated by this marker '•'

WHITE FLEXI HOSES

Not suitable for central heating.

Hot and cold water only, 6 Bar @ 65°C

WHITE PIPE AND ACCESSORIES

SPEEDPEX BARRIER PIPE

British Gas accepted for water pipe in vented and sealed central heating systems.

PART No.	SIZE MM X M	PACK QTY	BOX QTY
10BPEX-25C	10 x 25	1	20
10BPEX-50C	10 x 50	1	10
10BPEX-100C	10 x 100	1	6
15BPEX-25C	15 x 25	1	8
15BPEX-50C	15 x 50	1	5
15BPEX-100C	15 x 100	1	5
15BPEX-120C	15 x 120	1	5
15BPEX-150C	15 x 150	1	4
22BPEX-25C	22 x 25	1	8
22BPEX-50C	22 x 50	1	5

Suitable for central heating systems.

SPEEDPEX BARRIER PIPE

Straight lengths. 15 & 22mm in packs of 20. 28mm in packs of 10.

Minimum order for 6m lengths is 10 packs.

* By special order only.

PART No.	SIZE MM X M	PACK QTY
15BPEX-20x2L	15 x 2	20
15BPEX-20x3L	15 x 3	20
15BPEX-20x6L	15 x 6	20
22BPEX-20x2L	22 x 2	20
22BPEX-20x3L	22 x 3	20
22BPEX-20x6L	22 x 6	20
28BPEX-10x3L	28 x 3	10
* 28BPEX-10x6L	28 x 6	10

Suitable for central heating systems.

POLYBUTYLENE BARRIER PIPE

British Gas accepted for water pipe in vented and sealed central heating systems.

PART No.	SIZE MM X M	PACK QTY	BOX QTY
15BPB-25C	15 x 25	1	8
15BPB-50C	15 x 50	1	5
15BPB-100C	15 x 100	1	5
15BPB-120C	15 x 120	1	5
15BPB-150C	15 x 150	1	4
15BPB-300C	15 x 300	1	
22BPB-25C	22 x 25	1	8
22BPB-50C	22 x 50	1	5

Suitable for central heating systems.

PIPE IN PIPE

PART No.	SIZE MM X M	PACK QTY
15PIP-50C-E	15 x 50	1
22PIP-50C-E	22 x 50	1

PIPE INSERT

To be used when connecting Speedfit Pipe to a compression fitting.

TSM15N	15	50	500	5000
TSM22N	22	25	250	2000
TSM28N	28	10	150	1000

Suitable for central heating systems.

SUPERSEAL PIPE INSERT

To be used with Speedfit Pipe and Speedfit fittings, to give enhanced sealing.

PART No.	SIZE MM	BAG QTY	SMALL BOX	LARGE BOX
STS10	10	50	1000	12,500
STS15	15	50	500	5000
STS22	22	25	250	2000
STS28	28	10	150	1000

Suitable for central heating systems.

See page 3 for details.

GREY PIPE AND ACCESSORIES

PEX BARRIER PIPE

Straight lengths: The pipe has an inner barrier to stop the ingress of atmosphere.

PART No.	SIZE MM X	PACK QTY
15BPEX-20x2L-DG	15 x 2	20
15BPEX-20x3L-DG	15 x 3	20
22BPEX-20x2L-DG	22 x 2	20
22BPEX-20x3L-DG	22 x 3	20

Suitable for central heating systems.

POLYBUTYLENE BARRIER PIPE

MORE FLEXIBLE

Coils: The pipe has an inner barrier to stop the ingress of atmosphere.

PART No.	SIZE MM X M	PACK QTY
10BPB-50C-DG	10 x 50	1
15BPB-25C-DG	15 x 25	1
15BPB-50C-DG	15 x 50	1
22BPB-25C-DG	22 x 25	1

Suitable for central heating systems.

PIPE INSERT

PART No.	SIZE MM	BAG QTY	BOX QTY
TSM10DG	10	50	1000
TSM15DG	15	50	500
TSM22DG	22	5	250

Suitable for central heating systems.

RED AND BLUE PIPE AND PIPE ACCESSORIES

RED & BLUE SPEEDPEX BARRIER PIPE

Straight Lengths. The pipe has an inner barrier to stop the ingress of air.

Minimum order quantities:
15mm size, 20 packs of 20 lengths
22mm size, 10 packs of 20 lengths

PART No.	SIZE MM X M	PACK QTY
15BPEX20X6L-R	15 x 6	20

FITTINGS FOR COLD WATER SERVICES

ABOVE AND BELOW GROUND

This new range of fittings for MDPE Pipe has an improved Collet with stainless steel teeth to provide extra grip on the pipe and has WRAS Approval. The procedure for connecting and disconnecting the fittings is similar to that for Speedfit Plumbing Fittings, as shown on page 3. However, pipe inserts must be used in every connection.

ENERGY SAVER PLUS

The Economic Way to Heat Your Home

Unlike a conventional system, where radiators are connected to a common flow and return, this manifold system enables each radiator to have its own hot water supply. For ease of plumbing, the hot water can also be coupled to the manifold. Energy saving electrical controls are used to set time and temperature for each room.

Note: Energy Saver Plus can also be controlled using Network Control Products shown opposite.

For further information see our Underfloor Heating Brochure.

MANIFOLD - STAINLESS STEEL

NEW

PART No.	DESCRIPTION	PACK QTY
JGUFHMAN4/2	4 Zone	1
JGUFHMAN6/2	6 Zone	1
JGUFHMAN8/2	8 Zone	1
JGUFHMAN10/2	10 Zone	1
JGUFHMAN12/2	12 Zone	1

The manifolds are complete with adjustable flow gauge, drain valve and air bleed valve. They are pre-assembled on wall brackets and supplied with screws and plugs. Also supplied with 'STS' Pipe Inserts and Collet Clips.

LOW VOLTAGE UNDERFLOOR HEATING NETWORK CONTROL SYSTEM

The New Underfloor Heating Network Control System has electrical components 'networked' together using computer network cable. The basic system of Programmable Room Thermostats and Wiring Centre can be enhanced by a number of upgrade options.

- Range of de lux Touch Screen Programmable Room Thermostats.
- Central control of the whole system from a Touchpad controller.
- Software options to give direct control from a PC, via the internet or from a mobile phone.

For further information see our Underfloor Heating Brochure

PROGRAMMABLE ROOM THERMOSTATS

MAINS VOLTAGE CONTROLS

NEW RANGE

- Easy to use
- Easy to install
- Attractive slimline components

Easy to use and install the new mains voltage components offer simple effective control of up to 8 zones.

The JGUH3 Wiring Centre is the hub of the system. It works either in conjunction with the Touch Screen Time Clock and simple to use Dial Set Back Thermostat, or, alternatively with the Programmable Room Thermostats. There is also the ability to use both types of thermostats in the same system.

UNDERFLOOR HEATING FOR CONSERVATORIES AND EXTENSIONS

The Speedfit Underfloor Heating Control Unit is the ideal way to provide heating to a conservatory or room extension up to 30sqm.

The unit is pre-assembled and pre-wired to allow for a fast and simple installation. It can be plugged into any convenient electrical socket or spur.

CONTROL UNIT

PART No.	DESCRIPTION	PACK QTY
JGROOMPACK	Single Room Control Unit	1

For conservatories or room extensions up to 30sq metres.

SINGLE ROOM UNDERFLOOR HEATING PACK

PART No.	DESCRIPTION	PACK QTY
JGUFHPACK20	Underfloor Heating Pack	1

For conservatories or room extensions up to 20sq metres.

Pack contains:

- 1 x 15mm x 150m Coil Pipe
- 1 x Single Room Control Unit
- 1 x Programmable Room Thermostat
- 200 x 15mm Pipe Clips
- 2 x 15mm Pipe Inserts

PART No.	DESCRIPTION	PACK QTY
JGUFHPACK30	Underfloor Heating Pack	1

For conservatories or room extensions up to 30sq metres.

Pack contains:

- 2 x 15mm x 100m Coils of Pipe
- 1 x Single Room Control Unit
- 1 x Programmable Room Thermostat
- 300 x 15mm Pipe Clips
- 8 x 15mm Pipe Inserts
- 2 x 15mm Speedfit Equal Tees
- 2 x 15mm Speedfit Stem Elbows

WIRELESS CONTROLS NEW

NEW RANGE

- Easy to use
- Easy to install
- Wireless Range up to 100m

The new Wireless Control System permits flexible location of thermostats in domestic heating installations.

The programmable thermostats work in conjunction with the Wireless 8 Zone Wiring Centre, which is mains powered and is ideally suited to warm water underfloor heating as well as radiator installations. To extend the Wireless range, wireless repeaters are available to 'boost' the signal.

WIRELESS MULTI MODE THERMOSTAT

STOP VALVE

PART No.	SIZE MM	BAG QTY	Box QTY
15STVP	15	1	100
22STVP	22	1	50

Not suitable for central heating systems.
Hot and Cold water only, 65°C maximum.

BRASS STOP VALVE

PART No.	SIZE MM	BAG QTY	Box QTY
15BSCP	15	1	10

Only suitable for central heating systems.
Manufactured in DZR Brass.

WASHING MACHINE TAP •

PART No.	SIZE MM X BSP	BAG QTY	Box QTY
15AFTP	15 x 3/4"	1	200

Not suitable for central heating systems.
Hot and Cold water only, 65°C maximum.
For maximum torque figures on plastic thread, please see Technical Checklist.

APPLIANCE TEE •

PART No.	SIZE MM X BSP	BAG QTY	Box QTY
15 APT2P	15 x 3/4"	1	150

Not suitable for central heating systems.
Hot and Cold water only, 65°C maximum.
For maximum torque figures on plastic thread, please see Technical Checklist.

EMERGENCY SHUT OFF TAP •

PART No.	SIZE MM	BAG QTY	Box QTY
15 ESOTP	15	1	200

Not suitable for central heating systems.
Hot and Cold water only, 65°C maximum.

BRASS CHROME PLATED SERVICE VALVE •

PART No.	SIZE MM	BAG QTY	Box QTY
10HSVP	10	1	50
15HSVP	15	1	50
22HSVP	22	1	20

Suitable for central heating systems.

BRASS CHROME PLATED SERVICE VALVE WITH TAP CONNECTOR •

PART No.	SIZE MM X BSP	BAG QTY	Box QTY
15PTSVP	15 x 1/2"	1	50
22PTSVP	22 x 3/4"	1	20

Suitable for central heating systems.

BRASS CHROME PLATED BALL VALVE •

PART No.	SIZE MM	BAG QTY	Box QTY
15BVP	15	1	40
22BVP	22	1	20

Suitable for central heating systems.
Each valve has a red and a blue indice.

BRASS DRAIN COCK

PART No.	SIZE MM	BAG QTY	Box QTY
15BDGP	15	1	50

Suitable for central heating systems.
Manufactured in DZR Brass.
Speedfit Drain Cocks cannot be used where collet covers are fitted.
They can be used with a standard fitting fitted with a collet clip.

DOUBLE CHECK VALVE

PART No.	SIZE MM	BAG QTY	Box QTY
15DCVP	15	1	200

Not suitable for central heating systems.
Hot and Cold water only, 65°C maximum.

1/4 Turn Valves. These valves have been designed to allow temporary servicing of downstream equipment and must only be used in the fully open or fully closed position.

Do Not use these Valves:

- In a partially open position to control flow.
- To provide a permanent termination.
- Without tubing assembled or plugged (or threaded connections sealed).
- As a tap or "faucet".

1/4 Turn Valves are indicated by this marker '•'

PRE PACKED PRODUCTS CONTINUED

Products packed in a bag with instructions

FOR MERCHANDISING SUPPORT
SEE PAGE 23

SUPERSEAL PIPE INSERT

To be used with Speedfit Pipe and Speedfit fittings, to give enhanced sealing.

See page 3 for details.

PART No.	SIZE MM	BAG QTY	Box QTY
STS10 P	10	10	5000
STS15 P	15	10	3000
STS22 P	22	5	1000

Suitable for central heating systems.

NAIL CLIP

PART No.	SIZE MM	BAG QTY	Box QTY
NPC10P	10	20	5000
NPC15P	15	20	2000
NPC22P	22	10	1000

PRE PACKED PIPE & PIPE ACCESSORIES

SPEEDPEX BARRIER PIPE

British Gas accepted for water pipe in vented and sealed central heating systems.

PART No.	SIZE MM x M	PACK QTY	Box QTY
10BPEX-25C	10 x 25	1	20
15BPEX-25C	15 x 25	1	8
15BPEX-50C	15 x 50	1	5
22BPEX-25C	22 x 25	1	8
22BPEX-50C	22 x 50	1	5

Suitable for central heating systems.

PIPE CUTTER

PART No.	PACK QTY	Box QTY
JG-TS	1	30

For up to 22mm size pipe.

SPEEDPEX BARRIER PIPE

Straight lengths.
15 & 22mm in packs of 20.
28mm in packs of 10.

PART No.	SIZE MM x M	PACK QTY
15BPEX-20x2L	15 x 2	20
15BPEX-20x3L	15 x 3	20
22BPEX-20x2L	22 x 2	20
22BPEX-20x3L	22 x 3	20
28BPEX-10x3L	28 x 3	10

Suitable for central heating systems.

PIPE INSERT

To be used when connecting Speedfit Pipe to a Speedfit fitting or a compression fitting.

PART No.	SIZE MM	BAG QTY	Box QTY
TSM10NP	10	10	5000
TSM15NP	15	10	3000
TSM22NP	22	5	1000
TSM28NP	28	5	500

Suitable for central heating systems.

TECHNICAL CHECKLIST - PLUMBING AND HEATING FITTINGS

Fittings and pipe should be kept clean and undamaged before use.

- Sizes. 10mm to 28mm diameter.
- Pipes. Speedfit fittings can be used with:
 - Copper pipe to BS EN 1057
 - Speedfit Barrier Pipe to BS7291

Speedfit fittings cannot be used on stainless steel pipe

- Standards. Speedfit products are designed and manufactured under a fully integrated system assessed by B.S.I. to BS EN ISO9001. They are approved by the Water Regulations Advisory Scheme and BBA. Speedfit 'PEM', 'PSE' and 'SFM' Fittings and Speedfit Barrier Pipe are Kitemarked to BS7291 Parts 1, 2 and 3 Class S (Licence No. KM39767).
- Applications
 - Mains fed and indirect cold water systems
 - Vented and unvented hot water systems
 - Vented and sealed central heating systems
- DO NOT USE FOR Gas, fuel oil or compressed air applications.
- Working Temperatures and Pressures.

Application	Usual working temperature, °C	Maximum working temperature, °C	Maximum working pressure, bar
Cold Water (indirect and direct mains)	20	20	12
Central Heating	82	105, short term malfunction at 114	3
Hot Water (including unvented cylinders)	65	95	6

- Burst Pressure (fittings). With copper or plastic pipe at 20°C: Speedfit fittings used with copper or Speedfit Barrier Pipe will withstand pressures well in excess of normal service conditions.
- High Temperatures. Can withstand 114°C intermittently for short periods. The Speedfit system should not be used on an uncontrolled heat source.
- Insulation. Should comply with BS6700 and BS5422, as for copper.
- Minimum Bend Radii (BPEX)

Pipe Diameter	10mm	15mm	22mm	28mm
Min radius with clips	100mm	175mm	225mm	300mm
Min radius with cold forming bend	30mm	75mm	110mm	

- Clip Spacing (in mm)
For Surface Mounted Pipes

Pipe Diameter	Clip Spacing	
	Horizontal Run	Vertical Run
10-15mm	300mm	500mm
22mm	500mm	800mm
28mm	800mm	1,000mm

Where pipe is concealed, clipping may only be required where necessary.

- Expansion (PEX pipe). 1% on length between 20°C and 82°C.
- Flow Rates. Comparable with metal systems.
- Cleaners, Inhibitors and Descalents. For advice on the replenishment of additives such as corrosion inhibitors, the following manufacturers should be contacted: Fernox Manufacturing Limited on 01799 550811 or Sentinel, BetzDearborn Limited on 0151 420 9595.
- Paint and Chemicals. Use only water or oil based paint. Collet covers prevent paint ingress into fittings. **DO NOT ALLOW CONTACT WITH** oil based jointing compounds, cellulose based paints, paint thinners or strippers, solder flux or acid based descalents or aggressive cleaning products.
- Solder Flux. No fluxes of any types should come into contact with JG Speedfit Pipe and Fittings. If fluxes are to be used in an environment where Speedfit is installed, then (1) extreme care should be taken to ensure that no such contact takes place and (2) JG recommend installers only use fluxes tested and approved in writing in advance by JG. At the date of this publication, the only such approved flux is Fernox Flux.
- Chlorine. Speedfit is not suitable for use in systems where the water contains high levels of chlorine. e.g. swimming pools, fountains etc.
- Exposure to Sunlight. Speedfit products, when used indoors, are not affected by sunlight. When used outdoors protect from ultra violet light by lagging or painting.
- Pipe Clips. Pipe clips should not be fitted any closer than 60mm from the end of the fitting. Pipe should be adequately supported by pipe clips to prevent undue stress (side load) on fittings.
- Pipe Inserts. Must be used on all installations when using plastic pipe and should be fully inserted. Only use a Speedfit Insert with Speedfit Pipe.
- Metal Joists. When 'cabling' plastic pipe through metal joists ensure rubber grommets are in place to prevent damage to pipe. Use of collet covers or collet clips on fittings recommended.
- Connection to Boilers. A minimum 1 metre run of copper pipe must be installed between the boiler and the Speedfit system, as per BS5955: Part 8.

- Connection to Copper Pipe. 450mm is the minimum distance to make a solder connection on copper pipe inserted into a Speedfit Fitting. Ensure that any residual flux and solder does not come into contact with the fitting.
- Concrete and Masonry. Speedfit pipe and fittings can be laid in concrete and masonry providing they are installed in conduit pipe with access boxes for the fittings. This is to enable the pipe to expand and to provide accessibility for both pipe and fitting. As stated in Water Regulation Schedule 2.7 and BS8000: Part 15, fittings and pipe should be removable for possible replacement. Insulation is also recommended to protect against heat loss and the effects of frost.
- Electrical Continuity. If Speedfit is used in an existing metal system which may have been used for earthing, electrical continuity should be reinstated.
- Valves and Taps. Plastic 15mm and 22mm valves and taps available from JG Speedfit Ltd are not suitable for central heating installations.
- 1/4 Turn Valves. These valves have been designed to allow temporary servicing of downstream equipment and must only be used in the fully open or fully closed position.

Do Not use these Valves:

- In a partially open position to control flow.
- To provide a permanent termination.
- Without tubing assembled or plugged (or threaded connections sealed).
- As a tap or "faucet".
- Collet Covers. Collet covers provide added security against pipe disconnection, e.g. the fittings coming into contact with rigid surfaces and behind dry-lining walls. They are offered in white as standard and in red or blue to provide colour coding of pipe.
- Collet Clips. White and Grey collet clips are used with standard fittings to prevent accidental pipe disconnection. Red or blue clips provide colour coding of pipe. Red and blue clips should not be used to prevent accidental release of pipe.
- Continuously Operated Re-Circulating Systems (Secondary Hot Water Circulation/Ring Main Installations): A continuously operated re-circulating system is a water-replenished circulating system which is maintained at a constant high temperature to provide a constant source of hot water. Continuously operated re-circulating systems are used to distribute constant hot water to draw off points that may be distant from the source or hot water storage vessel. Continuously operated re-circulating systems are very different from conventional hot water supply and central heating systems found in domestic properties, for which our products have been tested to, under either BS7291 2010 Class S or WRAS approval standards, and for this reason Speedfit products must not be used on any continuously operated re-circulating systems as they are not approved under the current version of these standards. The exception would be those systems which have been designed for domestic situations with intermittent temperature of less than a maximum of 65°C. This is in accordance with BS7291.
- System Testing. To ensure the pipework and fittings have been installed correctly, whether it be on a new or extended system, it is essential that the system is checked and hydraulically wet tested. Testing should be at 2 bar for 10 minutes and 10 bar for 10 minutes. This testing, combined with other relevant checks, should reveal installation problems and is regarded as good plumbing practice. Speedfit Stop Ends and Plugs are particularly useful during this operation, enabling all outlets and any fittings to be easily plugged. However, system testing should not be regarded as a substitute for correct installation. See also "Making a Good Connection".
- System Flushing. As is usual practice for any plumbing installation, flushing of the system prior to the use of Speedfit is recommended to remove any contaminants/chemical residue from elsewhere in the system.

- British Gas Service has accepted the John Guest Speedfit fittings as being suitable for open vented and sealed central heating systems and as eligible for acceptance onto its service contracts.

- Products within this Price List are designed for use within UK plumbing and heating installations or in other countries where similar installation requirements apply. For information on products suitable for use in other countries please consult our Technical Advisory Service.

- Vermin. Speedfit products should not be used in vermin infested areas.
- Maximum Torque Figures (BSP & BSPT). Plastic threads are not generally as strong as brass threads. Customers and end users should be aware of this when choosing products for their applications. Overtightening of plastic threads will cause undue stress and eventual cracking and leakage. The maximum torque figures for BSP and BSPT threads used on Speedfit plumbing products in mating threads conforming to relevant BS or International thread standards are shown below.

Threads	Size	Maximum Torque
Plastic	1/2"	3.0 Nm
	3/4"	4.0 Nm
Brass	1/2"	4.0 Nm
	3/4"	5.0 Nm

It is recommended that all installations are checked prior to use to determine that a seal has been made.

- Side Loads. Fittings should not be subject to excessive side loads and they should not be used as support brackets. Tubing and fittings should be adequately supported to prevent excessive side loading.

TECHNICAL CHECKLIST - UNDERFLOOR HEATING

- **Applications.** Underfloor Heating Installations in solid or timber floors.
- **Pipes.** 15mm JG Speedfit Barrier Pipe to BS 7291, Parts 1, 2 and 3 Class S.
- **DO NOT USE Speedfit UFH Products for Gas, Fuel Oil or Compressed Air Applications.**
- **Floor Insulation.** Should be a suitable material and thickness to comply with current regulations.
- **Minimum Bending Radii.** For Speedfit B-PEX Pipe is 175mm.
- **Expansion (PEX - Pipe).** 1% on length between 20°C and 82°C.
- **Cleaners, Inhibitors and Descalents.** For advice on the replenishment of additives such as corrosion inhibitors, the following manufacturers should be contacted Fernox Manufacturing Limited on 01799 550811 or Sentinel, BetzDearborn Limited on 0151420 9595.
- **Paint and Chemicals.** Only use water or oil based paint. DO NOT ALLOW CONTACT WITH cellulose based paints, paint thinners or strippers, solder flux or acid based descalents or aggressive household cleaning products.
- **Exposure to Sunlight.** Speedfit products, when used indoors, are not affected by sunlight. When used out doors protect from ultra violet light by lagging or painting.
- **Pipe Inserts.** Must be used on all installations when using plastic pipe and should be fully inserted.
- **Electrical Components.** Electrical products in the Speedfit Underfloor Heating System are designed only to be used in U.K. Electrical Supply situations.
- **Electrical Continuity.** If Speedfit is used in an existing metal system which may have been used for earthing, electrical continuity should be reinstated.
- **Collet Clips.** White and Grey collet clips are used with standard fittings to prevent accidental pipe disconnection. Red or blue clips provide colour coding of pipe. Red and blue clips should not be used to prevent accidental release of pipe.
- **Pre-Screed System Testing.** To ensure the pipework has been installed correctly and prior to the screed being laid, it is essential that the system is checked and hydraulically wet tested.

Testing should be carried out at 2 bar for 10 minutes and 10 bar for 10 minutes.

This testing, combined with other relevant checks, should reveal installation problems and is regarded as good plumbing practice.

- **Pressurisation During Screed Laying & Curing.** In accordance with BS1264-4, the system should be left under pressure at a minimum of 6 bar for the duration of the laying and curing of the screed.
- **Under NO circumstances should the UFH System be used to quicken the screed drying process.**
- **System Flushing.** As is usual practice for any plumbing installation, flushing of the system prior to the use of JG Speedfit is recommended to remove any contaminants/chemical residue from elsewhere in the system.
- **Vermin.** Speedfit products should not be used in vermin infested areas.
- **Frost Protection.** During the installation process it is important that pipe containing water be protected from frost.

TECHNICAL CHECKLIST - FITTINGS FOR COLD WATER SERVICES

- **Applications.** Speedfit Fittings for Cold Water Services are designed to connect MDPE pipes (MRS-PE80) used above or below ground, to convey potable water from distribution mains to individual properties.
- **Pipes.** The Fittings can be used with:-
 - Blue MDPE pipe to BS6572.
 - Black MDPE pipe to BS6730.
 - Pipes conforming to ISO161/1, BS ISO11922 and DIN16893.
- **Adaptors.** Are available for:-
 - Copper to BS EN1057 and PEX or PB to BS7291.
 - Screwed pipe.
 - LDPE to BS1972 Class C and Class D in 1/2" and 3/4" sizes.
- **Fittings for PEX and Copper Pipe.** Must not be buried into ground, soil, concrete or other substrates.
- **Working Temperatures and Pressures.** Maximum working pressure 16 Bar @ 20°C.
- **Standards.** The Fittings are approved by the Water Regulations Advisory Scheme.
- **Performance.** The fittings are manufactured from tough plastic material well able to meet the stringent requirements of the water industry. They have been approved by the WRAS and, as such, have passed the 'pull out test' where a force shown below is applied to a connection between MDPE pipes and a fitting for 5 minutes without the connection failing.
- **Chemical Effects.** For below ground applications the fittings require no additional preparations - coating etc. When used above ground, avoid contact with aggressive chemical compounds. Protect from frost where necessary. In the United Kingdom, potable water does not contain high levels of chemicals (eg chlorine etc) that would adversely affect Speedfit Underground Fittings.
- **Exposure to Sunlight.** Permanent exposure to direct sunlight will necessitate lagging the fittings.
- **Pipe Inserts.** Pipe inserts must be used and fully inserted on all connections to MDPE, LDPE, PEX or PB pipe.
- **System Testing.** Pressure test to 1.5 times working pressure for 10 minutes before connecting to the mains supply. It is recommended that all pipe and fitting installations are pressure tested after installation before handing over to the final user
- **Maximum Torque Figures.** The maximum torque figures for BSP and BSPT threads used on Speedfit products are as follows:-

Size	Maximum Torque
1/2	3.0 Nm
3/4	4.0 Nm

It is recommended that all installations are checked prior to use to determine that a seal has been made.

The maximum torque figures quoted for use with Speedfit fittings are dependent on the mating thread conforming to the relevant British International thread standards.

	Size		
Test Force	20mm	25mm	32mm
Newtons	1900	2500	4100
lbs	427	562	921

- **DO NOT USE FOR Gas, Fuel Oil or Compressed Air Applications or Hot Water.**

GENERAL CONDITIONS OF SALE

1. GENERAL

(a) These conditions and any special conditions agreed in writing between us and the purchaser shall apply to all by us and all orders and contracts for the manufacture or sale of goods accepted or carried out by us to the exclusion of any conditions in the purchaser's order terms or otherwise imposed by the purchaser.
(b) All orders are subject to our written acceptance and in particular no binding contracts shall be created by the acceptance by the purchaser of a quotation or offer made by us unless and until we shall have accepted the order in writing.

2. DOCUMENTS

(a) Unless otherwise stipulated in our written acceptance all descriptions, illustrations, drawings in our catalogues and literature (copies of which are available on request) or submitted independently, estimates of performance, weights and measurements or other specifications provided by us are approximate only and we reserve the right to alter or amend the same at any time.
(b) We reserve the right at any time to correct clerical or technical errors in the contract documents.
(c) The purchaser shall furnish with his order all necessary specifications and information. We take no responsibility for goods manufactured, priced or delivered not in accordance with the order or the specifications unless the purchaser's order and specifications are clear and correct in every particular.

3. ADVISORY SERVICE

The advisory service which we provide in connection with our goods is part of our sales service and we do not make any charge for advice given. Any advice and assistance is given at the purchaser's risk and we shall not be liable for any loss, damage or claims arising therefrom.

4. HEALTH AND SAFETY AT WORK ACT

The purchaser's attention is drawn to the installation, maintenance and operating instructions given in our catalogues or literature. These should be carefully followed. Further information if required is available at our Head Office.

5. PRICES

(a) Unless otherwise stipulated all prices contained in our quotations and written acceptances are ex works and do not include the cost of packing. All orders are accepted on the condition that all such prices are subject to revision by us at any time before the goods are dispatched to take account of any increase in costs.
(b) In the event of the whole order quoted for not being placed with us we reserve the right to revise our prices.
(c) We also reserve the right to revise our prices if any changes are made by the purchaser in the specifications or quantities of the goods or delivery requirements after the order has been accepted.

6. VALUE ADDED TAX

VAT if not included in our quotation shall be added and payable where and at the rate applicable.

7. MINIMUM CHARGE

Depending on the product or service provided, a minimum order charge may be applicable. Details of these charges are as shown on current price lists or quotations or are available from the Customer Services Department.

8. TERMS OF PAYMENT

(a) Unless otherwise stipulated in our written acceptance our terms of payment are 30 days from date of invoice.
(b) Overseas business is accepted subject to special terms as to payment to be agreed prior to our written acceptance of the order.
(c) Where the contract is to be or may be fulfilled in separate installments, deliveries or part payment for each such installment delivery or part shall be made under sub-clause (a) above as if the same constituted a separate contract.
(d) We shall be entitled to interest on all sums overdue at the rate of two and one half percent above our bank's base rate from time to time in force.
(e) In the event of the purchaser for any reason whatsoever failing within one calendar month of the due date for payment to effect any payment which may be due under the contract or any contract with us, or if he commits any breach of the contract, or if he becomes insolvent or commits any act of bankruptcy or calls a meeting of or enters into a competition with or for the benefit of his creditors, or being a body corporate, has a receiver appointed of its undertaking or assets or any part thereof or a winding up order is made against the purchaser or the purchaser goes into liquidation (save for the purpose or reconstruction or amalgamation), we shall thereupon be entitled, without prejudice to our other rights, forthwith to terminate the contract or any unfulfilled part thereof, or at our option to make partial deliveries.

9. CANCELLATION

No order or other contract may be cancelled or varied except by agreement in writing with us, and on such terms as we may stipulate.

10. HANDLING CHARGE

Goods supplied in accordance with the purchaser's order may later be returned to us at our discretion provided the goods are unused. The purchaser will be required to pay to us a handling charge of 15% to 30% of the then current list price of such returned goods, dependent on the condition of the goods.

11. TIME FOR DESPATCH

(a) All periods or dates quoted for despatch and delivery are approximate only.
(b) We shall be entitled, without liability on our part and without prejudice to our other rights, to terminate the contract or any unfulfilled part thereof, or at our option to suspend or make partial deliveries if the completion or the manufacture of the goods by us or by our suppliers is prevented, hindered or delayed whether directly or indirectly by reason of the purchaser failing to furnish necessary information or instructions, or of any strikes, lock-outs, fire, flood, accident or damage to goods or delay in obtaining or inability to obtain through scarcity of materials, or any other cause whatsoever beyond our or our suppliers' reasonable control, whether such cause exists at the date of the order or not.

12. DELIVERY AND RISK IN GOODS

(a) Unless otherwise expressly agreed in writing, or as otherwise herein provided, delivery of the goods shall be deemed to be made when we have notified the purchaser that the goods are ready for despatch from our works and the risk in the goods shall thereupon pass to the purchaser. We shall not in any event be under any obligation to give to the purchaser the notice specified in Section 32 (3) of the Sale of Goods Act 1979.
(b) Notwithstanding that our prices are ex works we are prepared by special contract to procure carriage or freight and insurance on behalf of the purchaser and at his cost in which event we shall be under no liability for damage in transit loss or damage to the goods beyond the point of which we contract to deliver the same.
(c) The following provisions shall apply in relation to all deliveries of goods.
(i) we will entertain no claim for damage in transit, shortage of delivery or loss of goods, unless in the case of damage in transit or shortage of delivery a separate notice in writing is given to the carrier concerned and to us within three days of the receipt of the goods, followed by a complete claim in writing within five days of receipt of the goods and in the case of loss of goods, a separate notice in writing is given to the carrier concerned and to us and a complete claim in writing made within thirty days of the date of consignment;
(ii) where goods are accepted from the carrier concerned without being checked the delivery book of the carrier concerned must be signed 'not examined';
(iii) we shall have the right to attend at the purchaser's premises to inspect any goods in respect of which any such claim is made and the purchaser shall retain such goods until we shall have inspected such goods or until we have notified the purchaser that we do not wish to inspect such goods;
(iv) any breach of this condition shall dis-entitle the purchaser to any allowance in respect of the claim.
(d) Without prejudice to our other rights, should the purchaser fail for any reason to send us forwarding instructions within ninety days after the date of our notification that the goods are ready for despatch or to accept delivery of the goods we shall be entitled at the purchaser's risk and expense to store the goods and/or to procure or effect storage of the goods elsewhere. Goods so stored shall be paid for as if they had been dispatched and/or accepted.

13. PROPERTY IN THE GOODS

Until further payment has been received by us for all goods whatsoever supplied at any time by us to the purchaser:
(a) Property in the goods shall remain in us.
(b) Subject to sub-clauses (c) and (d) below the purchaser shall be at liberty to sell the goods in the ordinary course of business on the basis that the proceeds of sale shall be our property and that the purchaser shall account to us on demand.
(c) We may at any time revoke the purchaser's power of sale by notice to the purchaser if the purchaser is in default for longer than seven days in the payment of any sum whatsoever due to us or if we have bona fide doubts as to the solvency of the purchaser.
(d) The purchaser's power of sale shall automatically cease if the purchaser becomes insolvent or commits any act of bankruptcy or calls a meeting of or enters into composition or arrangement with or for the benefit of his creditors, or being a body corporate has a receiver appointed of its undertaking or assets or any part thereof or a winding-up order is made against the purchaser or the purchaser goes into liquidation (save for the purposes of reconstruction or amalgamation).
(e) Upon determination of the purchaser's power of sale under sub-clause (c) or (d) above the purchaser shall place the goods at our disposal and we shall be entitled to enter any premises of the purchaser for the purpose of removing such goods from the premises.

14. SPECIAL TOOLS OR DIES

Where it is necessary for us to manufacture or to purchase special tools, dies, jigs, mandrills in order to execute a contract the purchaser will be charged with a proportion of the cost of such special tools. Any such tools remain our property even when the purchaser has been charged with part of the cost.

15. TEST AND PERFORMANCE

(a) Our goods are, where practicable, submitted to our standard test before delivery. If special tests are required, these shall be made at our premises unless otherwise agreed, and will be charged extra.
(b) We accept no liability for failure to attain any performance figures quoted by us unless we shall have specifically guaranteed them with an agreed sum as liquidated damages and the purchaser has suffered loss by reason of the failure to attain the figures quoted.
(c) Any particulars of weights and measurements, power and consumption, power output or performance relating to the goods and like matters furnished by us to the purchaser in our catalogues, literature or otherwise, are approximate and are intended only to present a general idea of the goods to be supplied and unless previously agreed specifically in writing shall not form part of the contract.

16. FAULTS AND DEFECTS AND EXCLUSION OF LIABILITY

(a) We warrant that if within twelve months of delivery of the goods to the purchaser the purchaser returns immediately to our premises any of the said goods which he considers to be defective, carriage paid, properly packed and clearly marked with the purchaser's full name and address and any other information such as serial numbers which may be necessary to enable the goods to be identified, together with a complete description of the respects in which it is alleged that the goods are defective, such goods will be examined and should we be satisfied that the goods are defective, they will be repaired or new goods will be supplied in exchange and the goods so repaired or such new goods will be delivered to the purchaser free of charge at our premises provided that the foregoing warranty shall only be applicable if upon being required by us to do so the purchaser proves to our satisfaction:
(i) that the defect was due solely to defective workmanship;
(ii) that no alterations or repairs have been made to the goods except with our written consent;
(iii) that the defect was not caused by incorrect or negligent handling or storage, disregard of operating instructions, over-loading, unsuitable work, faulty erection or any other default by the purchaser, his servants or agents;
(iv) that the defect was not caused by fair wear and tear, accident, or any other matter beyond our reasonable control occurring after the date of receipt by the purchaser.
(b) All costs and expenses, including freight charges, customs duties and insurance costs incurred in returning the goods to our premises in accordance with this condition shall be for the account of the purchaser. The benefit of this warranty shall not be assignable by the purchaser.
(c) The warranty contained in sub-paragraph (a) above does not extend to any goods not manufactured by us although supplied by us nor does it extend to any second-hand or reconditioned goods. Goods not manufactured by us carry only the warranty (if any) of the makers and the purchaser is entitled to the benefit thereof only so far as we have the power to transfer it.
(d) The terms of this condition are in lieu of all conditions, warranties or other terms as to description, fitness for purpose, condition, merchantability, quality or otherwise in respect of the goods or repaired or replacement goods whether expressed in the contract or implied by common law, custom or statute and notwithstanding that such purpose or condition may be, may become or may have been known to us. Apart from our obligation to repair or replace goods in accordance with the terms of this condition, we accept no liability in respect of the goods whether for consequential loss or loss of profits or damages to third parties or otherwise, to the extent permitted by law.

17. INDEMNITY

The purchaser shall indemnify us against all actions, claims, demands, penalties and costs by third parties in tort, or for infringement, or alleged infringement, of patents, registered designs or other industrial property rights, or otherwise arising, in connection with the goods or with their delivery or unloading or with work done by us on the goods manufactured in accordance with the purchaser's specifications.

18. LIEN

In addition to any right of lien to which we may by law be entitled we shall have a general lien on all goods of the purchaser in our possession (although such goods or some of them may have been paid for) for the unpaid price of any other goods sold and delivered to the purchaser by us under the same or other contracts.

19. WAIVER

Our rights shall not be affected or restricted by any indulgence or forbearance granted to the purchaser. No waiver by us of any breach shall operate as a waiver of any later breach.

20. LAW AND JURISDICTION

The rights and obligations of the parties and all the terms and conditions thereof any disputes arising out thereof shall be construed in accordance with English Law to the jurisdiction of the courts of which the purchaser shall submit.

21. GENERAL

If any of these conditions or any part thereof:
(i) purports to exclude or restrict or limit any liability and such exclusion or restriction or limitation is prohibited or rendered void or unenforceable by any legislation to which it is subject;
(ii) is itself prohibited or rendered void or unenforceable by any legislation to which it is subject;
then the exclusion restriction or limitation on the condition or part thereof in question shall be so prohibited or rendered void or unenforceable to the extent to which it is prohibited or rendered void or unenforceable and no further and the validity or enforceability or any other part of these conditions shall not thereby be affected.

John Guest Speedfit Limited

Horton Road, West Drayton, Middlesex UB7 8JL, England.

John Guest fittings and related products are specifically designed and manufactured by John Guest to the Technical Specifications set out in the John Guest Product Catalogues. All John Guest fittings and related products should be selected, installed, used and maintained in accordance with these Technical Specifications. It is the customer's / user's responsibility to ensure that John Guest fittings and related products are suitable for their intended applications, are properly installed and maintained and are used in accordance with the Technical Specifications. It is also the customer's / user's responsibility to provide it's own customers with any relevant technical information about John Guest products it supplies them.

Speedfit should not be used for gas, fuel oil or compressed air applications.

John Guest produce a push fit system of pipe and fittings for compressed air situations. See separate literature for details.

The company has a policy of continuous research and development and reserves the right to amend without notice the specification and design of all products illustrated in this catalogue. John Guest Speedfit reserve the right to change the colour and shape of products. Photographs are for illustration purposes only.
